WORK EXPERIENCE

Full-Stack Development Intern | Code-Alpha

June 2026 – July 2026

- Developed and deployed scalable full-stack web applications using modern JavaScript frameworks within the MERN stack (MongoDB, Express.js, React, Node.js).
- Optimized frontend performance and backend API integration to improve application responsiveness and reliability.

Currently | Working as Full-Stack Development Intern at Labmentix

May 2026 – Nov 2026

- Delivering scalable full-stack projects using full fledged MERN technology
- Part time freelancer delivering market ready products

ACHIEVEMENTS

- Quasar 4.0 Hackathon (Jan 2026) – Won a national level hackathon.
- Hackathon Club, VPP COE – Represented the college across top regional and national hackathons, leading full-stack implementation and rapid prototyping under high-pressure, time-constrained settings.
- Advocated for modern web technologies (React, Edge Functions, serverless architecture) within departmental projects, helping transition legacy setups to modern full-stack workflows.

PROJECTS

PriceWiseAI: Smart Shopping System

- Built a full-stack MERN application (MongoDB, Express.js, React, Node.js) enabling online customers to have a simple and very clean UI based comparison Application.
- Implemented different API's and build own Router and Scraper for product Scraping.
- Designed a real-time dashboard for Product updates and Reviews

SKILLS

Java, HTML, CSS, JavaScript, TypeScript, MERN Stack (MongoDB, Express.js, React, Node.js), Typescript, Angular

EDUCATION

Computer Engineering | VPP COE

XII (HSC): 75%

CGPA: 7.8

X (SSC): 84%
